

Monday 20th February

Resource List for Sessions

Kitchen Cupboard Science Parts 1 and 2

Parental Supervision is Required Throughout Both Sessions

Part 1 (9.30-10.30am)

- Tall Clear Glass
- Jug of Water
- Lemonade*
- Raisins
- Fresh Egg
- Salt (quite a lot)
- Small Unopened Bottle of Lemonade* (must be a bottle)
- Balloon

*Please note that lemonade is required for two different experiments – however one must still have all its fizz and be in a small bottle, therefore we have specified a small unopened bottle of lemonade as a separate item to ensure that the fizz is there!

Part 2 (11.30am -12.30pm)

- Custard Powder (the children must not be aware of what this is, so please decant it into another container before giving it to them)
- Dessert Spoon and Teaspoon
- Plastic Bowl or Pudding Bowl
- Jug of Water
- Celery
- Red, Green, Blue and Yellow Food Colouring
- Sharp Knife
- Large Candle in holder (at least dinner table centre size – you can't go too big with the candle - but smaller than dinner table size and the experiment will not work) and means to light the candle
- Large Bag of Crisps (Sharing size)
- 5 Clear Glasses
- Weighing Scales
- Sugar (quite a lot)
- Calpol Syringe (or equivalent) – if possible.
